# REGIONAL SUPPORT FOR HYDROGEN

The objective of Bourgogne-Franche-Comté is to become a Positive Energy and carbon neutral region looking forward to 2050. The Hydrogen roadmap, developed in conjunction with all those involved in the hydrogen ecosystem, confirms the Bourgogne-Franche-Comté region's commitment to embracing the challenge of ecological and energy transition. The projects and territories committed to hydrogen in Bourgogne-Franche-Comté have received more than €800 million in support from the French State and the Region.

## STRONG PRESENCE OF BUSINESSES ALONG THE ENTIRE H2 VALUE CHAIN FROM PRODUCTION TO USES

As part of its regional strategy, Bourgogne-Franche-Comté is building an industrial ecosystem to cover the Hydrogen value chain as extensively as possible, from production and storage to the various uses (mobile or stationary, etc.).

## HYDROGEN IS IN OUR GENES!

The earliest work on Hydrogen Fuel Cell systems in Bourgogne-Franche-Comté began in 1999 with the members of the FC Lab research federation (later known as UAR FC Lab), associated with the CNRS (National Centre for Scientific Research).

In 2016, the region was certified as a "Hydrogen Territory" following a number of major demonstration projects putting the Hydrogen energy vector into practice in the region.

**2002**

**1<sup>st</sup> research facility** dedicated to Hydrogen Fuel Cell systems

**2011**

**1<sup>st</sup> French registration** of an approved Hydrogen vehicle: the F-City H<sub>2</sub>

**2015**

Creation of the **1<sup>st</sup> Master of Engineering course: Hydrogen Energy and Energy Efficiency** at uFC, ONE OF A KIND IN FRANCE

**2017**

Creation of the H2SYS spin-off

Marketing of the **1<sup>st</sup> H2 power generators** by H2SYS

1<sup>st</sup> financing for ENRgHy projects

**1999**

**1<sup>st</sup> research activities** related to Hydrogen Energy and Hydrogen Fuel Cells

**2008**

Start of Hydrogen-related activities at **MAHYTEC**

**2014**

**1<sup>st</sup> "Moby Post" and "MobilHy Test" experiments** in Bourgogne-Franche-Comté

**2016**

**"Hydrogen Territory" certification** for Bourgogne-Franche-Comté with ENRgHy

**2019**

Rougeot Energie company founded (now INTHY) to implement the **ISTHY project (International test and trial facility for qualification of H2 storage solutions)**

HYBAN project: France's only testbed for high-power hydrogen fuel cells, supported by FCLAB

**2019**

Auxerre winner of ADEME's nationwide H2 ecosystem calls for projects in 2019 and 2020

Nord-Franche-Comté, **winner of the Territoires d'Innovation call for projects** as part of the Programme d'Investissements d'Avenir (Investing in the Future Programme): €70 M

**2020**

Inauguration of the **FAURECIA centre of global expertise on H2 tanks**

Faurecia plant announced for production of fuel tanks in the Belfort-Montbéliard urban area

**2021**

Opening of new H2SYS premises: transition to the industrial phase

Announcement of a **McPhy site** coming to Fontaine, Belfort: the 1<sup>st</sup> alkaline electrolyser factory in France

Inauguration of Auxerre's **AuxHyGen** station and introduction of the 1<sup>st</sup> H2 buses

Completion of FAURECIA's H2 tank production factory

Success of the **1<sup>st</sup> Hydrogen Business For Climate Forum** in Belfort

**2022**

**Setting up of GEN-HY** in Technoland, France's 1<sup>st</sup> H2 electrolyser plant featuring its AEM technology

**2023**

Inauguration of the **FORVIA plant for the mass production of hydrogen tanks** in Allenjoie

Opening of the Danjoutin H2 station (Belfort)

**Setting up of the INOCEL gigafactory** to manufacture hydrogen fuel cells in Belfort

Hydrogen stations and vehicles in 5 lycées

Application submitted for experimentation of the first H2 train

Launch of the Dijon mobility ecosystem (H2 station, buses and refuse collection vehicles)

# MAJOR OPERATIONAL PROJECTS

Since Bourgogne-Franche-Comté became a certified Hydrogen Territory in 2016, many projects have been funded and deployed across the region, including the following\*...

### AUXR\_H2

Development of an ecosystem focused primarily on mobility applications (Bus, HGV, LV, RCV, regional trains), retrofitting and training

### BELFORT E-START

Creation of France's largest renewable energy community and number one in office buildings, with a photovoltaic production capacity of 3.3 MWc, combined with energy storage solutions based on batteries and green hydrogen

### DANJOUTIN STATION (BELFORT)

Multimodal H2 production, storage and distribution station, to power buses in the Greater Belfort area

### TES - ENERGY TRANSITION OF THE SCHIEVER GROUP

Deployment of a hydrogen ecosystem with mobile and stationary applications: refuse collection vehicles, buses, lorries, LVs, etc.

### FCLAB

Industrial testbed for high-power PEMFC hydrogen fuel cells (100-120 kWe)

### TERRITOIRE HABITAT 90

New demonstrator building equipped with a hydrogen production, storage and use system for heating and domestic hot water

### DIJON METROPOLE SMART ENERGHY

Deployment of a hydrogen ecosystem with mobile and stationary applications: refuse collection vehicles, buses, lorries, LVs, etc.

### ISTHY - HYDROGEN STORAGE INSTITUTE

Centre for tests, certification and periodic requalification of H2 tanks and components, one of a kind in France

### PRIMA H4 LOCOMOTIVE HYDROGEN VERSION

Locomotive manufactured by Alstom Belfort designed for switching and track-work tasks

## INDUSTRIAL EXPERTISE ESSENTIAL TO THE SECTOR

The local presence of an industrial network specialising in **metals and materials processing** and expertise in **surface treatment** are valuable assets for providing **complete manufacturing of the Hydrogen systems of tomorrow**.

Please contact us  
to find out more

# RESEARCH & INNOVATION

In Bourgogne-Franche-Comté, there is a very high level of synergy between research and businesses. This close connection is maintained by those involved therein.

## COMPETITIVENESS CLUSTERS INVOLVED IN HYDROGEN PROJECTS

This competitiveness cluster for vehicles and mobility solutions supports projects and their deployment in the Hydrogen field (stationary, mobile application, energy, carbon intensity reduction in industry), coordinates the H2BFC Club and organises the H2BFC Forum.

Cluster of industrial and academic stakeholders involved in the design and manufacture of low-carbon solutions (hydrogen, renewable energy, nuclear, etc.) and the reduction in the carbon intensity of industrial activities and uses

MECATEAMCLUSTER

Cluster specialising in the design, development and maintenance of heavy-duty railway machinery and infrastructure, studying electrification solutions.

Competitiveness cluster dedicated to rubber, plastic and composites supporting H2 storage and transport reduction solutions as well as innovative new materials for electrolyzers.

Agribusiness and agricultural equipment competitiveness cluster relating to the H2 sector: vehicle fleets, agrivoltaism, carbon intensity reduction in industry

## CUTTING-EDGE PUBLIC RESEARCH

FEMTO-ST INSTITUTE

Internationally renowned research laboratory (CNRS, uFC, SUPMICROTECH-ENSM, UTBM) => 120 researchers in H2 energy

FC LAB UAR

European Support and Research Unit on hydrogen fuel cells

UNIVERSITÉ de FRANCHE-COMTÉ

HYDROGEN ENERGY FACILITY

One of the largest European public facilities devoted to research, testing and the industrial transfer of H2 system

ISAT'S DRIVE LABORATORY

Optimisation of thermal and hybrid propulsion energy, composite materials and durability, vibratory and acoustic behaviours.

ICB LABORATORY

Research into materials for hydrogen fuel cells, high-temperature electrolyzers and solid storage

# SPECIALIST TRAINING

## CMI H3E - A MASTER OF ENGINEERING COURSE THAT'S ONE OF A KIND IN FRANCE

The Hydrogen Energy and Energy Efficiency (H3E) CMI offered by the university of Franche-Comté is a 5-year programme in the energy production and management engineering trades for students who will become experts in the fields of energy efficiency and clean energy, with specific expertise in Hydrogen Energy (production, transport and stationary applications, etc.).

**UNIVERSITÉ**   
**FRANCHE-COMTÉ**

From the BUT (university Bachelor of technology) to Master's level, UFC delivers courses focused on renewable energies and energy efficiency.

26 courses focusing on hydrogen and 1 Hydrogen Energy and Energy Efficiency (H3E) CMI

**UBFC**   
UNIVERSITÉ  
BOURGOGNE FRANCHE-COMTÉ

**uB**  
UNIVERSITÉ DE BOURGOGNE

uB schools of engineering deliver courses focused on the physics of materials, civil engineering, mechanics (POLYTECH Dijon) and courses on the design, production and operation of vehicles (ISAT).

 **utbm**  
université de technologie  
Belfort-Montbéliard

Specialised Master's in Hydrogen Energy courses: Energy production, Networks, conversion and storage, Transport and embedded energy systems, Electrical engineering by apprenticeship  
1 Master's Degree course in Electrical Energy

  
RÉGION ACADÉMIQUE

COMTÉ**

### VOCATIONAL

#### AND TECHNOLOGICAL LYCÉES

In 2024, seven lycées in Bourgogne-Franche-Comté will offer vocational **Baccalauréats** and BTS (senior technician diplomas) with a focus on hydrogen (Renewable energy installer, Electrical professions and related environments, Energy efficiency and maintenance, Maintenance of production systems, Vehicle maintenance, Motor drives, Chemical and water processes, etc.).

**RÉGION  
BOURGOGNE  
FRANCHE  
COMTÉ**

Since 2023, a training module dedicated to risks of explosion (ATEX) is delivered to all jobseekers trained by the Region in industrial professions: welding/boiler-making/pipe assembly, industrial production and maintenance operator.

**UIMM**  
LA FABRIQUE  
DE L'AVENIR

2 BTS courses in maintenance of H2 systems Master's degree in Quality, Health, Safety, Environment with a focus on Hydrogen maintenance

**le cnam**  
Bourgogne – Franche-Comté

CNAM vocational bachelor's degree in maintenance of H2 energy systems

**UIMM**  
L'ÉCOLE  
DE L'AVENIR  
LA FABRIQUE  
DE L'AVENIR

**aifo**  
Association  
Franco-Italienne  
de l'Industrie

H2-related "Skills incubator"  
Training courses dedicated to the installation and maintenance of hydrogen equipment  
Senior Technician in industrial maintenance with a focus on H2

 **Arts et Métiers**  
Sciences et  
Technologies

Studies in mechanical, industrial, and energy engineering

 **SUP  
MICRO  
TECH**  
ENSIMM

Schools of engineering specialising in mechanics and microtechnology

## THE REGIONAL ECONOMIC AGENCY OF BOURGOGNE-FRANCHE-COMTÉ

The Regional Economic Agency cooperates closely with stakeholders in business development, innovation, training, and employment for:

Business project engineering for each regional strategic sector

Financial engineering

Innovative project engineering, ecological transition and energy recovery

Economic changes

Promotion and communication
