BOURGOGNE-FRANCHE-COMTÉ
Land for Success

Jérôme DURAIN

President of the Bourgogne-Franche-Comté Regional Council

As France's leading industrial region, Bourgogne-Franche-Comté is proud of its industry and its expertise, which is recognized worldwide. Industry is part of our region's historical DNA.

Thanks to our competitiveness clusters and our sectors of excellence in agri-food, luxury goods, microtechnology, automotive, healthcare, energy, and hydrogen, we are recognized as a territory of excellence, whose highly skilled workforce is in high demand.

A land of research, innovation, and sustainable development, the region, located in the heart of Europe, also offers a strategic environment for companies wishing to set up and/or develop their business. Many companies have already chosen Bourgogne-Franche-Comté in all fields ; from the infinitely small with nanomedicine to the infinitely large with numerous industrial cathedrals. Our ecosystem is rich in diversity and fosters the creation of great synergies.

With the regional economic agency Bourgogne-Franche-Comté, we work every day environment ground for business development, preserve jobs, and strengthen the competitiveness of our territory.

Facing contemporary macroeconomic challenges (innovation, structural changes, international competitiveness), the Region stands alongside businesses and local authorities (EPCI), determined to pursue the economic development of our territory.

Editorial

Together, let's build the region's economic future.

In Bourgogne-Franche-Comté, we don't just support businesses and territories : we propel them towards excellence. Every day, our Agency works alongside businesses to promote their regional roots, strengthen their competitiveness, and enhance the attractiveness of the territories. Because the times demand it, we are acting with determination to turn challenges into opportunities.

Our region is on the move. Bourgogne-Franche-Comté demonstrates its ability to attract talent and ambitious projects. Thanks to close collaboration between the Agency, Business France, the Region, and the local authorities, we are accelerating the establishment of investors in key sectors: hydrogen, health, energy, luxury goods, agri-food, mobility, and more. Traditionnal industries are strengthening, new ones are emerging, and our ecosystem is establishing itself as fertile ground for innovation and industry of tomorrow.

Our strength? Targeted expertise and collective action. With five areas of expertise at the heart of our mission—economic development, national and international prospecting, innovation and ecological transition, territorial intelligence, attractiveness, and marketing—we do everything possible to respond precisely to regional initiatives. We are not just facilitators: we are project catalysts, partners committed to making your ambitions a reality.

Bourgogne-Franche-Comté is a land of boldness and experimentation. Here, creativity turns into growth, ideas into achievements, and each territory becomes a lever for development. Join us in this dynamic and let's work together to create the conditions for the next economic success of our region.

An ambitious policy to support businesses...

The Region's economic policy is set out in the Regional Strategy for Economic Development, Innovation, and Internationalisation (SRDEII), adopted in June 2022.

The ambitions of the Bourgogne-Franche-Comté SRDEII 2022-2028 are based on five key principles:

- › Ensuring successful transitions and the attractiveness of Bourgogne-Franche-Comté, and affirming the principles of public action
- › Meeting the challenges facing industry in a new phase of globalisation
- › Supporting the local economy: a new regional ambition
- › Deepening cooperation between the Region and inter-municipal authorities to promote employment and local communities
- › Steering and evaluating economic action together in a complex world

The Bourgogne-Franche-Comté Region has developed intervention tools to meet these various objectives, which will be examined with each project leader.

... and transitions

Regional businesses, AER BFC offers tailored support to help you:

- › Decarbonise your business by recovering waste heat and integrating renewable energies
- › Eco-design your products and services to respond to market developments
- › Rethink your business model to make it more sustainable and resilient

The Energy Transition and Sustainable Economy division of AERBFC is a member of the Bourgogne-Franche-Comté Ecological and Economic Transition Networks (RT2E) and a member of the renewable energy facilitators in Bourgogne-Franche-Comté.

These networks are funded by ADEME (ecological transition agency) and the Region.

Industrial sectors

Food

> @La Moutarderie Fallot

Bourgogne-Franche-Comté boasts expertise across the entire value chain, from field to fork.

The region is home to Vitagora, one of Europe's leading agri-food innovation clusters with more than 660 members, including 60 multinationals and large businesses. It coordinates a regional network of 12,000 food science and healthcare researchers and engineers.

With its industrial specialisation, Bourgogne-Franche-Comté is an outstanding environment for experimentation, in particular for the development of agro-ecology providing answers to agricultural and ecological transition issues.

Driven by the agricultural production that represents the terroir, and with a solid reputation for quality, collaboration is everywhere in the agri-food industry thanks to a structured network of partners and infrastructure: experimental/phenotyping platforms, sensory analysis, and technical labs, etc. This ecosystem is perfect for hatching start-ups as well as developing mature businesses, who find within the network the support and expertise that places them on the cutting edge of research and innovation.

Luxury & exceptional know-how

Bourgogne-Franche-Comté is the cradle of watchmaking and eyewear, and is brimming with expertise sought by the leading luxury brands. Its industrial fabric is mainly made up of SMEs that produce goods in many different business lines. They also very discreetly produce components and products under contract for the world's biggest brands. Over time, genuine ecosystems made up of hundreds of companies, research labs, and training bodies have developed. Exceptional know-how, meticulously passed on.

TIMEPIECES/JEWELLERY/PRECIOUS METALS & EYEWEAR:

Design and creativity place watchmakers, jewellers and eyewear designers in a movement that combines tradition and cutting-edge technology.

LEATHER GOODS: Designers and business both find a comprehensive range of skills, each driven to unparalleled levels of excellence.

LUXURY GOODS: Wood, ceramics, horn, metal, stone, precious gems, traditional and synthetic materials, and more ... they all share the art of precision and the expectation of perfection.

LUXURY EXPERIENCES: The wealth of Bourgogne-Franche-Comté's natural, cultural, and human-made heritage has produced some amazing histories (vineyards, gastronomy, UNESCO World Heritage Sites). > See page 31

Energy

> Nuclear and conventional energies

For over 150 years, steam boilers, followed by nuclear boilers, as also both steam and gas turbines, have all been built here, and today they are used by 20% of the world's power stations and all of France's nuclear power stations.

The growth of this industry has brought new research laboratories and university courses specialising in energy-related studies, as well as developing robust competencies in engineering throughout the region. Bourgogne-Franche-Comté is now a major player in the Energy sector.

Hydrogen

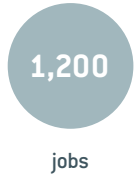

Expanding the hydrogen sector has been one of the Bourgogne-Franche-Comté region's strategic goals for over 20 years now, a regional roadmap for this having been adopted in 2019, while in 2016 the region was awarded "Hydrogen Territory" status. The hydrogen sector is now backed by a fertile and pioneering academic base, with dynamic input from both industrial players and all its economic partners, local authorities, competitiveness clusters, etc. The hydrogen technology value chain is very much present across the region, innovating day after day, and encompassing areas from research, with the FCLAB for example, to projects for major clients.

An array of industrial projects has been developed over the last decade, with the emergence of start-ups, the setting up of industrial facilities, including an electrolyser Gigafactory, and the spontaneous creation of, or branching out into, new production or service activities for mid-market companies and SMEs... The Bourgogne-Franche-Comté Region is mobilising €100 million for the period 2020 - 2030, and the sector is also receiving support as part of the regional acceleration and innovation plan.

Forest & Timber

Bourgogne-Franche-Comté is one of France's most wooded regions – over a third of its land is forested, providing a rich reservoir of biodiversity. Forested land is also a source of economic wealth, with wood being used for material and energy purposes.

All the related sectors are present in the region: forest nurseries, forestry businesses, forest management, timber harvesting and transport, wood processing for construction and interior and exterior fittings, packaging, sawmills, cooperage, marquetry, wood energy and so on. Almost half of the people employed in the sector work in wood working companies, sawmills and timber construction firms.

> PARTNERS

Mobilities

> Automotive

The long-standing presence of world-class manufacturer Stellantis, with 15 different brands under its umbrella, is testimony to the region's well-established dynamism in this sector: Bourgogne-Franche-Comté, land of the automotive adventure. Stellantis chose Bourgogne-Franche-Comté to further boost its position, and its Sochaux site can produce 400,000 vehicles a year, making it an industry benchmark as Europe's highest performing plant. The region is also home to an array of specialist suppliers and global centres of excellence, such as Faurecia's R&D centre in Bavans.

Moreover, local resources are available to support all stakeholders in the sector, including research laboratories, engineering schools and business clusters operating in the mobility industry. The future of the automobile as a sustainable mobility solution is being written right now in Bourgogne-Franche-Comté, at the Pôle Véhicule du Futur competitiveness cluster.

> Soft mobility

Motivated by the cost of fuel, growing awareness of climate issues and the ease with which they can be used in town, scooters, cycles and other cargo bikes have gone from being a piece of sports equipment to a means of mobility in their own right. Now a complement to, or even an alternative to, the car, these forms of mobility have seen significant growth in recent years, and the trend is accelerating. The USC forecasts that bicycle sales will increase sixfold by 2030, driven by electrically assisted bicycles.

Bourgogne-Franche-Comté is a region that places soft mobility at the heart of its mobility strategy, with three conurbations equipped with fleets of self-service bicycles, 2,000 km of cycle paths and more than 850 clubs and associations.

Aeronautics

The region's businesses played an active role in the renaissance of the French aerospace industry in the wake of the Second World War. Jodel and Robin aircraft, to name just two, have contributed to the sector's growth, and helped make France the world's second leading country in numbers of pilots.

This industrial activity paved the way for innovation which can still be seen in the sector's ecological transition with several hybrid or hydrogen motorisation projects. Expertise in civil and military aviation and defence is built atop an industrial fabric with complementary technology skills.

It is a comprehensive sector: aircraft manufacturers and airport service and maintenance companies rub shoulders with a dense network of commercial and military aviation subcontractors.

Digital

The digital economy, a driver of economic growth and job creation, continues to grow in Bourgogne-Franche-Comté, and in 2024 the regional ecosystem was awarded the 'Capitale #FrenchTech' label in recognition of its dynamism and the quality of its structure.

What's more, Bourgogne-Franche-Comté abounds with universities, specialist colleges, and research and industry labs which make it an attractive digital region with a sound reputation.

Quality infrastructure like very high-speed internet, incubators, business centres and data centres across the region cater to the demands of digital businesses.

DIJON UNIVERSITY HOSPITAL

Dijon Bourgogne University Hospital is the region's leading cancer care establishment and benefits from cutting-edge technical platforms and expertise in numerous specialities such as the digestive system, pneumology, and paediatric haematology-oncology. It also works in other areas of research including:

- Lipid metabolism, inflammation, diabetes and vascular risk
- Functional and molecular imaging
- Genomics of developmental anomalies
- Sensory, motor and cognitive impairments, etc.

BESANÇON UNIVERSITY HOSPITAL

The university hospital in Besançon focuses its research work on four areas:

- Technological innovations
- Biotherapies: immunotherapy for cancer, transplantation and grafts, cell and genetic therapy
- The INCREASE university-hospital federation on inflammatory diseases
- Risks and vulnerability: infectious, neuro-cardiovascular, ethics/medical progress and vulnerable populations, quality of life

GEORGES-FRANÇOIS LECLERC CENTRE (CGFL)

The CGFL is France's second-biggest centre in terms of the inclusion of patients in clinical research. The Centre focuses its research in the following areas:

- Personalised medicine in medical oncology
- Functional and molecular imaging
- Radiotherapy and radiobiology
- Epidemiological research and quality of life

THE BOURGOGNE-FRANCHE-COMTÉ NATIONAL BLOOD SERVICE

Cellular engineering, medical biology, cord blood and tissue bank, innovative therapy research, teaching, and production of advanced medical treatments. Labelled as an industrial integrator of the Grand Biomedical Challenge.

- Grand Est Cord Blood Bank
- Grand Est Transfusion Biobank

ÉTABLISSEMENT FRANÇAIS DU SANG

Effective collaboration between industry, training and research

SATT SAYENS

COMPANY FOR THE ACCELERATION OF TECHNOLOGY TRANSFER IN BOURGOGNE-FRANCHE-COMTÉ AND THE GRAND EST (LORRAINE & SUD CHAMPAGNE)

This entity works to streamline, support, and accelerate the transfer of public technology and research to private companies of any size, through licensing, co-development of demos, R&D cooperation, and the creation of spin-offs and start-ups.

DECA-BFC

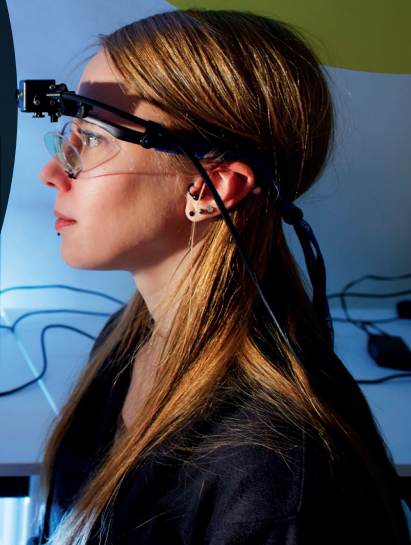

(BOURGOGNE-FRANCHE-COMTÉ REGIONAL INCUBATOR)

A mechanism to support the creation of innovative companies based on scientific and technological projects resulting from or linked to public research.

FRANCHE-COMTE' INNOV (FC' INNOV)

PARTNERSHIP FOUNDATION BY THE UNIVERSITY OF MARIE ET LOUIS PASTEUR

FC' INNOV contributes to the advancement of science and technology, the development of scientific innovation in relation to the economic world, and the development of translational research. In particular, it is developing breakthrough technologies based on fundamental research carried out at the FEMTO-ST Institute with its FEMTO Engineering centre and at the RIGHT Laboratory with its BIONOVEO health R&D centre.

THE PREHISTORIC PILE
DWELLINGS

The region also features on UNESCO's representative list of
the **Intangible Cultural Heritage of Humanity** for its skill and
expertise in the mechanics of watchmaking mechanics

Highly rated, award-winning gastronomy

The diversity and quality of produce combined with the know-how of local producers make our region one of the most highly appreciated by gourmets from around the world.

| 32 Michelin-starred restaurants

| 140 protected denominations of origin (AOC/PGI)

| 3 wine discovery centres: Beaune, Mâcon and Chablis

| 6 "Outstanding Taste" sites

The Cité Internationale de la Gastronomie et du Vin, in Dijon city centre, features 1,750 square metres of exhibition space providing the keys to understanding the "French gastronomic meal", which is listed as an intangible cultural heritage of humanity. It is also a space for economic, commercial and tourist development around gastronomy and wine.

A region of great wines

Burgundy's vineyards enjoy international renown with their **33 grands crus** including: Aloxe-Corton, Chablis, Gevrey-Chambertin, Ladoix-Serrigny, Montrachet, Romanée-Conti, Vosne-Romanée...

The Jura vineyard stretches some 2,000 hectares with four geographic AOCs (Arbois, Côtes-du-Jura, Château-Chalon, l'Étoile) and 3 AOC products (Macvin, Marc du Jura, Crémant du Jura).

The International Organisation of Vine and Wine, also located in Dijon, provides grape and wine producing and consuming countries with information to develop regulations, minimise trade barriers, promote sustainable production and protect consumers.

CYCLING

Iconic routes through
unspoilt natural environments
1,350km of cycle trails of cycle routes and greenways
"La Grande Traversée du Massif Central (GTMC)" [1,400km
mountain biking route] from Avallon to Cap d'Agde

SKIING

1 national Nordic skiing centre
2 classified downhill ski resorts (Les Rousses and Métabief)
26 alpine ski areas
23 Nordic ski areas

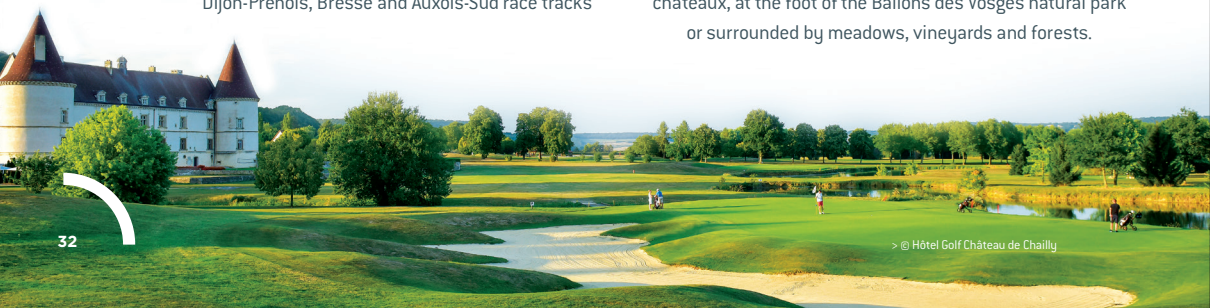

SPORTS MÉCANIQUES

The Nevers Magny-Cours and Villars-sous-Écot race
tracks host international meetings
Dijon-Prenois, Bresse and Auxois-Sud race tracks

GOLF

33 golf courses, including 20 18-hole courses, located at
the heart of the Jura natural park, near some prestigious
châteaux, at the foot of the Ballons des Vosges natural park
or surrounded by meadows, vineyards and forests.

Some major professional teams

FOOTBALL

- { AJ Auxerre
- { DFCO (Dijon)
- { FC Sochaux-Montbéliard

BASKETBALL

- { Elan Chalon
 - { JDA Dijon Basket
- ### RUGBY
- { USON Nevers Rugby

HANDBALL

- { Belfort Aire Urbaine Handball
- { Entente Sportive Besançon ladies
- { Grand Besançon Doubs Handball
- { Dijon Métropole Handball

Culture all year round

VENUES

Zénith and Auditorium in Dijon, Commanderie in Dole, Nouveau Théâtre Besançon – National Dramatic Centre of Franche-Comté, Franche-Comté national choreography centre at Belfort, Chalon-sur-Saône national centre for street arts, Dijon Bourgogne Theatre, etc.

Consortium and Regional Contemporary Art Fund (FRAC) in Dijon, Besançon Cité des Arts

MUSEUMS

Besançon and Dijon Museums of Fine Arts
Courbet Museum in Ornans
Nicephore Niépce Museum in Chalon-sur-Saône
“Aventure Peugeot” Museum in Montbéliard
MuséoParc Alésia

CULTURAL EVENTS WORTH A VISIT

Vesoul International Film Festival of Asian Cinema, Eurockéennes at Belfort, Chalon street festival, Haut-Jura music festival, international festival of baroque opera at Beaune, musical encounters of Vezelay, Festival de la Paille in Métabief, Besançon international classical music festival, D’jazz in Nevers, and more!

> Le Consortium (Dijon) @ Vincent ARBELET

> Les Eurockéennes de Belfort, rock festival @ René GARCIA

Companies, territories: an agency on hand to assist with your growth

The Bourgogne-Franche-Comté region
has set us the following strategic objectives:

ASSIST

the maintenance and
development of economic
activity and employment
in the region

PROSPECT

in France and
abroad

DEVELOP

innovation, research,
ecological transition and
energy recovery

PROMOTE

the economic
development policy

SUPPORT

the region's
economic appeal,
implementing it regionally

All our actions are carried out in close collaboration and in line with the players involved in economic development, innovation, ecological transition, energy recovery, training and employment (generalists, sector specialists, technologists, academics, experts, funders).

*"Our job is to promote the region's appeal.
We promote the region's appeal in France and abroad. We have to
inspire companies to move and to grow in Bourgogne-Franche-Comté.
We want to show that our region and our cities are real alternatives
with growth opportunities for businesses."*

Agnès RAMILLON
Managing Director of the AER BFC

Business services

At each stage in a company's development, a single representative from our team provides confidential professional assistance and customised follow-up.

Business project engineering by strategic sector in the region carried out by business experts

- >Diagnosis of company needs
- >Technical, Financial, Legal and HR Engineering
- >Search for land and commercial real estate
- >Search for partners
- >Connection with the public and private ecosystem of economic development and innovation

Financial engineering

- >Preliminary financial diagnosis
- >Identification of available public and private funds
- >Organisation of round table discussions with partners

Engineering for innovative projects, ecological transition and energy recovery

- >Project diagnosis and monitoring of innovative business projects
- >Innovation, ecological transition, renewable energies and heat recovery - carried out in partnership with the Region and ADEME Bourgogne-Franche-Comté
- >Presta'INNO funded by Bpifrance and the Bourgogne Franche-Comté region

Economic changes

- >In partnership with the Region and government departments

Promotion and communication

- >Promotion of sector-based groups
- >Economic development of the region and its territories
- >Participation at local, national and international trade fairs

Services for the territories

Economic engineering

- >The Business France relay in Bourgogne-Franche-Comté
- >Relay for the EPCI (Public Establishment for Intercommunal Cooperation), working with companies to support them as they set up and grow
- >Knowledge, inventory and management tools: socio-economic observatory, land and commercial real estate
- >Economic diagnosis and support for economic strategy

Assistance with decision-making and information sharing

- >Studies and appraisals
- >Participation in local agencies working for economic development
- >Connection with other EPCIs with similar projects
- >Information sharing

Raising awareness about innovation and ecological transition

- >Coordinating a network of the region's stakeholders in innovation
- >Raising awareness about innovation and ecological transition among the EPCI's services and companies in the region
- >Bibliometrics and mapping of patents registered across the region (in partnership with Bourgogne Franche-Comté CCI)

Economic changes

- >In partnership with the region and the State services

Promotion and appeal of the region

- >Portraits of territories
- >Attractiveness strategies
